

ENGINEERED FLOORING

REFERENCE GUIDE

AUGUST 2023

ENGINEERED HERRINGBONE PARQUETRY

Features and Benefits

- Coated with a 10% UV cured acrylic matte and brushed for added texture
- The 3mm nominal hardwood top layer allows re-sanding and re-coating for a long service life
- Each board is end matched and tongue and grooved for a tight board-to-board fit and consistent finish
- The clear coating highlights the natural colour and timber finishes
- No mess and fumes from sanding and finishing

Installation Requirements

Pentarch Engineered Herringbone Parquetry™ must be glued down over a level subfloor such as a concrete slab, particleboard or plywood sheeting or over old timber floors. For further information, see the Pentarch Engineered Herringbone Parquetry™ installation guide. It is recommended that parquetry flooring is installed by a professional as it requires specific methodology and equipment.

Specifications

Board Size	670 x 134 x 14mm
m ² Per Board	0.089
Boards Per Box	12 (6 left and 6 right boards)
m ² Per Box	1.077
Boxes Per Pallet	44
m ² Per Pallet	47.403

Species

Blackbutt

Spotted Gum

Grade – Standard & Better

Carefully graded to include the most interesting and moderate timber characteristics. This grade offers a minimum level of natural features suited to most design styles.

metallon XL™

Quicksilver

Care & Maintenance

With regular care and maintenance, you can enjoy a lifetime of beauty with your Pentarch Engineered Flooring.

- For daily cleaning, use dry methods such as vacuuming and sweeping. To remove stubborn dirt, use a well-rung mop and a pH neutral cleaner. Do not clean timber floors with a steam mop.
- Place doormats at entrances, non-slip rugs in high-wear areas and protective pads under furniture legs.
- Do not use any abrasive brushes, steel wool, soap detergents or ammonia based cleaners.
- Always take care when moving appliances and furniture by placing them on a sturdy mat to slide into position.

Sustainably Grown. Australian Made.

Note: Variations within a timber species are normal, therefore photographs, samples and displays can only be indicative of colour and should not be used for final selection. It is normal for natural timber products to react to changes in atmospheric and environmental conditions such as humidity and temperature.
